

Application Map

This file contains two visual maps:

- Structural architecture (how parts fit together)
- Build map (phases and parallel workstreams)

Structural Map (Architecture)

```
flowchart TB
    subgraph User
        U[Web App (Desktop/Mobile)]
    end

    subgraph Frontend
        FE[Next.js UI]
    end

    subgraph Backend
        API[API Server]
        Q[Job Queue]
    end

    subgraph Data
        DB[(Postgres)]
        FS[(Object Storage)]
    end

    subgraph Integrations
        Plaid[Plaid Bank Sync]
        Email[Email Import/Export]
    end

    U --> FE --> API
    API --> DB
    API --> FS
    API --> Q
    Q --> DB
    Q --> FS
    API --> Plaid
    API --> Email

    subgraph Core Services
        Ingest[Ingestion + Parsing]
        Normalize[Normalization + Dedupe]
        Classify[Rules + COA]
        Reports[Report Engine]
        Reconcile[Reconciliation]
        Export[Export/Delivery]
    end
```

```
API --> Ingest --> Normalize --> Classify --> Reports --> Reconcile --> Export
Ingest --> DB
Normalize --> DB
Classify --> DB
Reports --> DB
Reconcile --> DB
Export --> FS
```

Build Map (Phases + Parallel Streams)

```
flowchart LR
    subgraph Phase1[Phase 1: Foundations (Weeks 1-3)]
        P1A[Data model + migrations]
        P1B[Auth + multi-business]
        P1C[Storage + upload pipeline]
        P1D[Parsing queue + basic normalization]
    end

    subgraph Phase2[Phase 2: Core Engine (Weeks 4-7)]
        P2A[Normalization + dedupe]
        P2B[COA + rules engine]
        P2C[Report engine (P&L/BS/CF)]
        P2D[Period logic]
    end

    subgraph Phase3[Phase 3: Product UX (Weeks 8-10)]
        P3A[Upload -> report flow]
        P3B[Report views + filters]
        P3C[Export + scheduled delivery]
        P3D[Plaid sync + reconcile UX]
    end

    subgraph Phase4[Phase 4: Hardening (Weeks 11-12)]
        P4A[Accuracy QA]
        P4B[Monitoring + error handling]
        P4C[Beta + polish]
    end

    P1A --> P2A --> P3A --> P4A
    P1B --> P2B --> P3B --> P4B
    P1C --> P2C --> P3C --> P4C
    P1D --> P2D --> P3D --> P4C
```
